

Building Research Partnerships (NI) workshop evaluation

'Building Research Partnerships' is designed for researchers and patients, carers, and members of the public who want to get involved in research

17 people attended our in-person workshop on 24th September 2024

79% 'strongly agreed' and 21% 'agreed' they found this opportunity to learn and share with others useful

82% rated the workshop as 'excellent' and 18% rated it as 'good'

58% 'strongly agreed' and 42% 'agreed' that they would recommend the training to others

How will attendees apply their learning?

Discuss involvement with my manager and maybe consider if we should have a regular group for PPI

Reflect more on the perspective of researchers, looking at it from the other side

Will apply it to practice as a researcher

Have more confidence to offer my services to PPI

I will consider PPI and the different ways it can be used to influence future studies and use it from the start to the end of the project
